

## **Goblin Slayer Peer Review**

**Quality of Work:** (3 points) The code looks like it is set up well, I have not used C#, so I can't fully judge the code.

**Intellectual Merit:** (3 points) I like playing video games and Goblin Slayer sounds like a fun action-packed game, that Anime fans will like.

**Video:** (0 points) I did not find a video.

**Quality of Outline:** (2 points) The outline gives a good explanation of what they are doing but could explain more on the steps of how they are going to get a completely functioning game.

**Intellectual Merit:** (2 points) As stated in the quality of outline that it explains the goals well but could use more on the steps you are taking to complete this project.

**Video:** (0 points) I did not find a video on either the code or the outline.
