

Goblin Slayer Peer Review2

Quality of Work: (3 points) The game seems to be going well as you have many components of the game and are planning to put them together. I like the idea of being able to upgrade the different skills as you pass levels. Good job and keep up the hard work!

Project Progress: (3 points) Your game has made progress and is starting to show how the game will turn out. The game looks like it will be exciting to play once things are all finished.

Video: (3 points) You explained well how the different parts of the game work and how the game is structured. You also explain what you plan to add to the game in the future to make the game better.

Quality of Draft: (0 points) There is no rough draft, but even if you are not done with your project, you could start the rough draft and put in an introduction and lay out what the rest of the paper will contain when you are done with the game.

Journal: (1 points) Even though you do not have a journal listed anywhere I'm sure there are plenty out there you can pick from.

Video: (2 points) The video did not talk about the rough draft, but you did talk about the steps of the project which will end up in your rough draft.
